

Fig. S1 (Supplementary data 1) Dai CL et al.

**Fig. S1. Dose-response curves of MCF-7, MCF-7/adr, S1 and S1-M1-80 cell lines treated with lapatinib alone.**

Cells were treated with full-range concentration of lapatinib for 72 h. Cell viability was determined by MTT assay as described in “Materials and Methods”. Data is the means  $\pm$  SD of at least three independent experiments performed in triplicate.

Fig. S2 (Supplementary data 2) Dai CL et al.

**Fig. S2. Dose-response curves of HEK293-pcDNA3.1 and HEK-293/ABCG2 transfected cell lines treated with lapatinib alone.**

Cells were treated with full-range concentration of lapatinib for 72 h. Cell viability was determined by MTT assay as described in “Materials and Methods”. Data is the means  $\pm$  SD of at least three independent experiments performed in triplicate.
